Dear FEC Staff,

This letter is follow up to discussions with Michael Hartsock regarding the delay in filing the semi annual report with the FEC.

The campaign has made best efforts to comply with filing requirements but had trouble with the electronic filing password.

Our records indicate that a password was requested on May 2 and confirmed with Sebene Smith on May 5th. Yet attempts to file with the password failed.

At the time we went to address the problem, our treasurer was out of the country and unable to request another password.

The PAC requested a temporary password to file immediately, but was denied the request. The PAC also requested the ability to file an unofficial paper copy to show good faith, but had that request denied as well.

As soon as we were able to request a new password, the report was successfully filed.

This was the first report filed by Green Mountain PAC and we do not anticipate additional problems having filed successfully with the second approved password.
